Education and Certifications

George Mason University — Fairfax, VA
Master of Science in Business Analytics — *Expected Dec 2028*
Bachelor of Science in Management Information Systems — *Expected Dec 2027*

Experience

Microsoft AI Ambassador — Oct 2026 - Present
George Mason University — *Fairfax, VA*

- Developed, tested, and documented customized AI workflows using Microsoft tools, strictly applying responsible AI practices to ensure data privacy, security, and consistent human oversight.
- Presented project progress and finalized technical solutions to stakeholders, leveraging strong communication skills and targeted Microsoft AI training to drive innovation and technical problem-solving.
- Collaborated in a cross-functional capacity with George Mason's ITS and diverse university departments to analyze operational workflows and conduct cost-benefit analysis to design practical, AI-enabled solutions.

Data Science & AI Intern — May 2026 - Aug 2026
JK Moving Services — *Sterling, VA*

- Designed and implemented predictive machine learning models and Python-based automation workflows, improving data processing speed by 20% to 30% while significantly reducing manual logging errors across operations.
- Analyzed 1000+ monthly shipments and complex operational datasets using Pandas, NumPy, and Matplotlib to identify deep supply chain inefficiencies and uncover critical patterns for strategic business improvement.
- Leveraged SQL to query complex operational databases, efficiently managing, auditing, and extracting critical datasets containing over 10000+ individual records for high-impact data analytics projects.

Business Analyst Intern — Sep 2025 - Dec 2025
Sameday Pack — *Herndon, VA*

- Identified and resolved deep data inconsistencies by auditing and cleaning 500+ individual product listings in CMS, drastically improving total system data accuracy and catalog integrity.
- Designed and deployed dynamic dashboards in Tableau to actively track multi-channel product performance and real-time sales trends, significantly enhancing executive decision-making capabilities.
- Automated repetitive and recurring operational reporting processes via custom scripts in Excel and Python, reducing manual baseline workloads for the team by 30% over the course of the internship.

Projects and Leadership

Dispatch Scheduling & Logistics Automation | *HTML5, CSS3, JSON, Supabase* — June 2026 – Present

- Engineered an AI-assisted data-processing pipeline using Python, Pandas, NumPy, SQL, JSON, and Excel, leveraging machine learning/AI-based pattern recognition to clean, normalize, and reconcile 500+ logistics.
- Developed Automated scheduling, conflict detection with a drag-and-drop UI and workload visualization enabling dispatchers to schedule with 40% less time consumption
- Designed a scalable logistics data architecture leveraging multiple tools, establishing a foundation for future automated dispatch optimization, analytics, and real-time operational reporting.

Outreach Coordinator | *MISOMA* — Jan 2026 – Present

- Spearheaded professional outreach initiatives to coordinate guest speakers, panels, and tech recruitment events.
- Maintained direct correspondence with regional IT alumni and corporate representatives to secure strategic professional partnerships and recruitment opportunities.
- Managed a student volunteer marketing committee to execute targeted outreach strategies, successfully boosting general meeting active attendance by 20%.

Technical Certifications & Skills

Certifications: AWS Cloud Essentials
Relevant Coursework: Database Management Systems, Networks and Security, Principles of Computing, Business Analytics & AI, Statistics & Software Business Analytics, Operations Management
Languages: Python, SQL (MySQL), R, JSON, HTML, JavaScript
Frameworks: Power BI, Tableau, Looker Studio, DBT, Statsmodels, Google BigQuery, HubSpot, Salesforce, Supabase
Cross-functional Skills: Data Analysis, Data Cleaning, Data Visualization, Statistical Modeling, Reporting, Forecasting, Data-Driven Decision Making, Performance Analysis, Trend Analysis, Cost-Benefit Analysis, Communication Skills, Teamwork, Time Management, Adaptability, Attention to Detail, Project Coordination
